Subject Index of Volume 153

Acid complexes
  reduction of Cr(VI) by D-galacturonic acid and formation of stable Cr(V) intermediates, 61
Alkyl complexes
  preparation and structural characterization of methylmercury(II) complexes of minor tRNA-base 7-methylguanine, 247
Aluminium complexes
  aspects of interaction of silicic acid with Al in dilute solution and its biological significance, 1
Amine
  interaction of fluoroaniline with cytochrome $P\text{-}450_d$ mutants; difference absorption spectral studies, 161
Amine complexes
  crystal structures
    of three thiourea (tu) complexes of Pt(II); *trans*-$[(tu)_2Pt(NH_3)_2]Cl_2$, *trans*-$[(tu)_2Pt(CH_3NH_2)_2]Cl_2 \cdot 3H_2O$ and $[Pt(tu)_4]Cl_2$, 51
    of two Pt(II) diamine compounds; *trans*-$Pt(CH_3NH_2)_2Cl_2$ and *cis*-$Pt[(CH_3)_2NH]_2Cl_2$, 45
  potential multifunctional anti-cancer metal complexes; synthesis and X-ray structural studies of some dinuclear Rh(II) carboxylate complexes with diamine-substituted acridine ligands in terminal coordination positions, 219
  re-investigation of reactions between superoxide anion and metal picolinate complexes, 213
  synthesis and antitumor activity
    of series of 1,2-diaminocyclohexanepalladium-(II) dicarboxylate complexes, 255
    of N-substituted iminodiacetato(1,1-bis[amino-methyl]cyclohexane)Pt(II) complexes, 129
    of Pt(II) complexes containing selenito ligand, 137
  trichloroamine complexes of Pt; preparation, crystal structure and solution behavior of cytosinium trichlorocytosineplatinate(II), 31
  vibrational spectra of diammineplatinum(II) disodium 5′-uridine monophosphate blue complex, 145
  water soluble DACH–Pt(II) complexes; problems of purification; stability of complexes with N-containing ligands, 123
Amino acid complexes
  comparison of ^{13}C NMR chemical shifts of 2-aminovaleric acid, L-methionine and DL-selenomethionine and their interactions with aurothiomalate in aqueous solution, 209
  interactions of water-soluble Zn porphyrin with amino acids, 199
  Pt(II) complexes of amino acids and peptides; structural analysis of *trans*-$[Cl_2Pt(L\text{-}HAlaOH)_2]$, 171
Ammonia complexes
  crystal structures of three thiourea (tu) complexes of Pt(II); *trans*-$[(tu)_2Pt(NH_3)_2]Cl_2$, *trans*-$[(tu)_2Pt(CH_3NH_2)_2]Cl_2 \cdot 3H_2O$ and $[Pt(tu)_4]Cl_2$, 51
Antitumor activity
  antitumor properties of some titanocene chalcogenates, 119
  potential multifunctional anti-cancer metal complexes; synthesis and X-ray structural studies of some dinuclear Rh(II) carboxylate complexes with diamine substituted acridine ligands in terminal coordination positions, 219
  solvolytic behavior and cytostatic properties towards KB cell-line of dppf and 1,2-bis-(diphenylphosphino)ethane *cis*-complexes of Pt(II) and Pd(II), 67
  synthesis and antitumor activity
    of series of 1,2-diaminocyclohexanepalladium-(II) dicarboxylate complexes, 255
    of N-substituted iminodiacetato(1,1-bis[amino-methyl]cyclohexane)Pt(II) complexes, 129
    of Pt(II) complexes containing selenito ligand, 137
Apoenzyme complexes
  derivatives of purple phosphatase from red kidney bean; replacement of Zn with other divalent metal ions, 39
ATP complexes
  interaction of $MgATP^{2-}$ with DNA; assessment of metal binding sites and DNA conformations by spectroscopic and thermal denaturation studies, 79

Bidentate ligand complexes
  solvolytic behavior and cytostatic properties towards KB cell-line of dppf and 1,2-bis-(diphenylphosphino)ethane *cis*-complexes of Pt(II) and Pd(II), 67
  synthesis and characterization of neutral In chelates with dithio ligands, 135
  water soluble DACH–Pt(II) complexes; problems of purification; stability of complexes with N-containing ligands, 123
Biological activity
  aspects of interaction of silicic acid with Al in dilute solution and its biological significance, 1

© Elsevier Sequoia/Printed in Switzerland

Carbohydrate complexes
D-Glucose interaction with U ion; synthesis, spectroscopic and structural characterization of uranyl–glucose adducts and effect of metal cation binding on sugar anomeric structures, 155
Carbon monoxide complexes
spectral properties of carbon monoxide or cyanide complexes of cytochromes *c'* from denitrifying bacteria, 227
Carbonyl complexes
synthesis and structure of CO-containing phenoxo-bridged dicopper(I) complex, 73
Carboxylate complexes
potential multifunctional anti-cancer metal complexes; synthesis and X-ray structural studies of some dinuclear Rh(II) carboxylate complexes with diamine-substituted acridine ligands in terminal coordination positions, 219
synthesis and antitumor activity of series of 1,2-diaminocyclohexanepalladium(II) dicarboxylate complexes, 255
Carboxylato complexes
water soluble DACH–Pt(II) complexes; problems of purification; stability of complexes with N-containing ligands, 123
Chalcogenolato complexes
antitumor properties of some titanocene chalcogenates, 119
Chelate complexes
solvolytic behavior and cytostatic properties towards KB cell-line of dppf and 1,2-bis-(diphenylphosphino)ethane *cis*-complexes of Pt(II) and Pd(II), 67
synthesis and antitumor activity of N-substituted iminodiacetato(1,1-bis[aminomethyl]cyclohexane)Pt(II) complexes, 129
synthesis and characterization of neutral In chelates with dithio ligands, 135
water soluble DACH–Pt(II) complexes; problems of purification; stability of complexes with N-containing ligands, 123
Chromium complexes
reduction of Cr(VI) by D-galacturonic acid and formation of stable Cr(V) intermediates, 61
Cobalt complexes
acceleration of ionic reactions by naturally occurring glycosaminoglycans, 165
effects of solvent on dioxygen binding to Co(II) picket fence porphyrins, 183
ESR evidence of formation of new superoxide complex of tetra-*p*-tolylporphyrinatocobalt(II) in aprotic solvents, 201
modification of heme·heme oxygenase system with Fe and Co tetrasulfonated phthalocyanines, 13
thermodynamics for base binding to four atropisomers of Co(II) picket fence porphyrin; intramolecular ligand–ligand interactions, 175
Copper complexes
Cu mediated hydroxylation of modified monooxygenase model system, 9
luminescence decay from Cu(I) complexes of metallothionein, 115
preferential binding of Cu ions to superoxide dismutase subunits lacking metal ions in Zn sites, 189
solution properties of Cu(II)–sarcosinehydroxamic acid, 193
synthesis and structural characterization of Cu(II) complex with 2-(ethylthiomethyl)benzimidazole, 5
synthesis and structure of CO-containing phenoxo-bridged dicopper(I) complex, 73
Crystal structure(s)
of *trans*-$[Cl_2Pt(L\text{-}HAlaOH)_2]$, 171
of CO-containing phenoxo-bridged dicopper(I) complex, 73
of Cu(II) complex with 2-(ethylthiomethyl)benzimidazole, 5
Cu mediated hydroxylation of modified monooxygenase model system, 9
of cytosinium trichlorocytosineplatinate(II), 31
of some dinuclear Rh(II) carboxylate complexes with diamine-substituted acridine ligands in terminal coordination positions, 219
of methylmercury(II) complexes of minor tRNA-base 7-methylguanine, 247
of *trans*-$Pt(CH_3NH_2)_2Cl_2$ and *cis*-$Pt[(CH_3)_2NH]_2Cl_2$, 45
of *trans*-$[(tu)_2Pt(NH_3)_2]Cl_2$, *trans*-$[(tu)_2Pt(CH_3NH_2)_2]Cl_2 \cdot 3H_2O$ and $[Pt(tu)_4]Cl_2$, 51
Cyanide complexes
spectral properties of carbon monoxide or cyanide complexes of cytochromes *c'* from denitrifying bacteria, 227
Cyclopentadienyl complexes
antitumor properties of some titanocene chalcogenolates, 119
Cytochrome *c* complexes
spectral properties of carbon monoxide or cyanide complexes of cytochromes *c'* from denitrifying bacteria, 227
Cytochrome $P\text{-}450_d$
interaction of fluoroaniline with cytochrome $P\text{-}450_d$ mutants; difference absorption spectral studies, 161

Dinuclear complexes
Cu mediated hydroxylation of modified monooxygenase model system, 9
potential multifunctional anti-cancer metal complexes; synthesis and X-ray structural studies of some dinuclear Rh(II) carboxylate complexes with diamine-substituted acridine ligands in terminal coordination positions, 219
synthesis and structure of CO-containing phenoxo-bridged dicopper(I) complex, 73

Dioxygen complexes
effects of solvent on dioxygen binding to Co(II) picket fence porphyrins, 183
DNA complexes
interaction of $MgATP^{2-}$ with DNA; assessment of metal binding sites and DNA conformations by spectroscopic and thermal denaturation studies, 79

Electrochemistry
of Fe porphyrin nitrosyls in presence of pyridines and amines, 25
Electronic structure
metallothionein synthesis and its induction mechanism; correlation with metal ion electronic configurations and softness parameters, 87
Enzyme complexes
modification of heme·heme oxygenase system with Fe and Co tetrasulfonated phthalocyanines, 13
Equilibrium studies
ligand binding to cytochrome *c* and other related haem proteins and peptides, 93

Fluorescence
study of fluorescent substance contained in murine tumor C3H/MH 134, 75

Gold complexes
comparison of ^{13}C NMR chemical shifts of 2-aminovaleric acid, L-methionine and DL-selenomethionine and their interactions with aurothiomalate in aqueous solution, 209
reactions of hemopexin and liver fatty acid-binding protein (L-FABP) with aurothiomalate, 57

Hemoprotein
interaction of fluoroaniline with cytochrome $P\text{-}450_d$ mutants; difference absorption spectral studies, 161
Hydroxamic acid complexes
solution properties of Cu(II)–sarcosinehydroxamic acid, 193

Indium complexes
synthesis and characterization of neutral In chelates with dithio ligands, 135
Iron complexes
acceleration of ionic reactions by naturally occurring glycosaminoglycans, 165
derivatives of purple phosphatase from red kidney bean; replacement of Zn with other divalent metal ions, 139
electrochemistry of Fe porphyrin nitrosyls in presence of pyridines and amines, 25
model complexes for high spin Fe(II) state in catalytic cycle of cytochrome P450, 235
modification of heme·heme oxygenase system with Fe and Co tetrasulfonated phthalocyanines, 13
on nature of protoporphyrin(IX) Fe(III) in aqueous solution at and below pH of precipitation, 133
re-investigation of reactions between superoxide anion and metal picolinate complexes, 213
towards understanding of quadrupole splittings found in Mössbauer spectroscopic data of number of substituted tetraphenylporphyrin-iron(III) halides, 139

Kinetics and mechanism
fluorescence stopped-flow kinetic study of displacement of 2-[(2-bis[carboxymethyl]amino-5-methylphenoxy)methyl]-6-methoxy-8-bis-[carboxymethyl]aminoquinoline (quin2) from its Ca^{2+}, Pr^{3+}, Tb^{3+}, Dy^{3+} and Yb^{3+} complexes by ethylenedinitrilotetraacetate (edta) in aqueous solution, 21
interactions of water-soluble Zn porphyrin with amino acids, 199
ligand binding to cytochrome *c* and other related haem proteins and peptides, 99
re-investigation of reactions between superoxide anion and metal picolinate complexes, 213

Ligand complexes
ligand binding to cytochrome *c* and other related haem proteins and peptides
equilibrium studies, 93
kinetic studies, 99
temperature dependence studies, 105
Luminescence
luminescence decay from Cu(I) complexes of metallothionein, 115

Magnesium complexes
interaction of $MgATP^{2-}$ with DNA; assessment of metal binding sites and DNA conformations by spectroscopic and thermal denaturation studies, 79
Mercury complexes
preparation and structural characterization of methylmercury(II) complexes of minor tRNA-base 7-methylguanine, 247
Metal complexes
fluorescence stopped-flow kinetic study of displacement of 2-[(2-bis[carboxymethyl]amino-5-methylphenoxy)methyl]-6-methoxy-8-bis-[carboxymethyl]aminoquinoline (quin2) from its Ca^{2+}, Pr^{3+}, Tb^{3+}, Dy^{3+} and Yb^{3+} complexes by ethylenedinitrilotetraacetate (edta) in aqueous solution, 21
Metalloprotein complexes
diagnostic test for Ru and Pt modification of histidine residues on metalloproteins using diethylpyrocarbonate (DEPC), 205

Metallothionein complexes
luminescence decay from Cu(I) complexes of metallothionein, 115
Metallothionein compounds
metallothionein synthesis and its induction mechanism; correlation with metal ion electronic configurations and softness parameters, 87
Mössbauer spectroscopy
towards understanding of quadrupole splittings found in Mössbauer spectroscopic data of number of substituted tetraphenylporphyrin-iron(III) halides, 139
Mutagenesis
interaction of fluoroaniline with cytochrome P-450$_d$ mutants; difference absorption spectral studies, 161

Nitrosyl complexes
electrochemistry of Fe porphyrin nitrosyls in presence of pyridines and amines, 25
Nucleobase complexes
preparation and structural characterization of methylmercury(II) complexes of minor tRNA-base 7-methylguanine, 247
trichloroamine complexes of Pt; preparation, crystal structure and solution behavior of cytosinium trichlorocytosineplatinate(II), 31
Nucleotide complexes
vibrational spectra of diammineplatinum(II) disodium 5′-uridine monophosphate blue complex, 145

Palladium complexes
solvolytic behavior and cytostatic properties towards KB cell-line of dppf and 1,2-bis-(diphenylphosphino)ethane *cis*-complexes of Pt(II) and Pd(II), 67
synthesis and antitumor activity of series of 1,2-diaminocyclohexanepalladium(II) dicarboxylate complexes, 255
Peptide complexes
ligand binding to cytochrome *c* and other related haem proteins and peptides
equilibrium studies, 93
kinetic studies, 99
temperature dependence studies, 105
Pt(II) complexes of amino acids and peptides; structural analysis of *trans*-[Cl_2Pt-(L-HAlaOH)$_2$], 171
Phenoxo complexes
synthesis and structure of CO-containing phenoxo-bridged dicopper(I) complex, 73
Photoredox reactions
highly active water-soluble Zn porphyrins for photoredox reactions, 77
Phthalocyanine complexes
modification of heme·heme oxygen system with Fe and Co tetrasulfonated phthalocyanines, 13

Platinum complexes
crystal structures
of three thiourea (tu) complexes of Pt(II); *trans*-[(tu)$_2$Pt(NH_3)$_2$]Cl_2, *trans*-[(tu)$_2$Pt-(CH_3NH_2)$_2$]$Cl_2 \cdot 3H_2O$ and [Pt(tu)$_4$]Cl_2, 51
of two Pt(II) diamine compounds; *trans*-Pt-(CH_3NH_2)$_2Cl_2$ and *cis*-Pt[(CH_3)$_2$NH]$_2Cl_2$, 45
diagnostic test for Ru and Pt modification of histidine residues on metalloproteins using diethylpyrocarbonate (DEPC), 205
Pt(II) complexes of amino acids and peptides; structural analysis of *trans*-[Cl_2Pt-(L-HAlaOH)$_2$], 171
solvolytic behavior and cytostatic properties towards KB cell-line of dppf and 1,2-bis-(diphenylphosphino)ethane *cis*-complexes of Pt(II) and Pd(II), 67
synthesis and antitumor activity
of N-substituted iminodiacetato(1,1-bis-[aminomethyl]cyclohexane)Pt(II) complexes, 129
of Pt(II) complexes containing selenito ligand, 137
trichloroamine complexes of Pt; preparation, crystal structure and solution behavior of cytosinium trichlorocytosineplatinate(II), 31
vibrational spectra of diammineplatinum(II) disodium 5′-uridine monophosphate blue complex, 145
water soluble DACH–Pt(II) complexes; problems of purification; stability of complexes with N-containing ligands, 123
Polydentate ligand complexes
Cu mediated hydroxylation of modified mono-oxygenase model system, 9
fluorescence stopped-flow kinetic study of displacement of 2-[(2-bis[carboxymethyl]amino-5-methylphenoxy)methyl]-6-methoxy-8-bis-[carboxymethyl]aminoquinoline (quin2) from its Ca^{2+}, Pr^{3+}, Tb^{3+}, Dy^{3+} and Yb^{3+} complexes by ethylenedinitrilotetraacetate (edta) in aqueous solution, 21
Polysaccharide complexes
acceleration of ionic reactions by naturally occurring glycosaminoglycans, 165
Porphyrin complexes
effects of solvent on dioxygen binding to Co(II) picket fence porphyrins, 183
electrochemistry of Fe porphyrin nitrosyls in presence of pyridines and amines, 25
ESR evidence of formation of new superoxide complex of tetra-*p*-tolylporphyrinatocobalt(II) in aprotic solvents, 201
highly active water-soluble Zn porphyrins for photoredox reactions, 77
interactions of water-soluble Zn porphyrin with amino acids, 199

model complexes for high spin Fe(II) state in catalytic cycle of cytochrome P450, 235
on nature of protoporphyrin(IX) Fe(III) in aqueous solution at and below pH of precipitation, 133
thermodynamics for base binding to four atropisomers of Co(II) picket fence porphyrin; intramolecular ligand–ligand interactions, 175
towards understanding of quadrupole splittings found in Mössbauer spectroscopic data of number of substituted tetraphenylporphyrin-iron(III) halides, 139
Porphyrin compounds
study of fluorescent substance contained in murine tumor C3H/MH 134, 75
Protein complexes
ligand binding to cytochrome *c* and other related haem proteins and peptides
equilibrium studies, 93
kinetic studies, 99
temperature dependence studies, 105
modification of heme·heme oxygenase system with Fe and Co tetrasulfonated phthalocyanines, 13
reactions of hemopexin and liver fatty acid-binding protein (L-FABP) with aurothiomalate, 57
Protein compounds
metallothionein synthesis and its induction mechanism; correlation with metal ion electronic configurations and softness parameters, 87

Rhodium complexes
potential multifunctional anti-cancer metal complexes; synthesis and X-ray structural studies of some dinuclear Rh(II) carboxylate complexes with diamine-substituted acridine ligands in terminal coordination positions, 219
Ruthenium complexes
diagnostic test for Ru and Pt modification of histidine residues on metalloproteins using diethylpyrocarbonate, 205

Selenito complexes
synthesis and antitumor activity of Pt(II) complexes containing selenito ligand, 137
Silicic acid complexes
aspects of interaction of silicic acid with Al in dilute solution and its biological significance, 1
Sugar complexes
D-Glucose interaction with U ion; synthesis, spectroscopic and structural characterization of uranyl–glucose adducts and effect of metal cation binding on sugar anomeric structures, 155
reduction of Cr(VI) by D-galacturonic acid and formation of stable Cr(V) intermediates, 61
Superoxide complexes
ESR evidence of formation of new superoxide complex of tetra-*p*-tolylporphyrinatocobalt(II) in aprotic solvents, 201
re-investigation of reactions between superoxide anion and metal picolinate complexes, 213
Superoxide dismutase complexes
preferential binding of Cu ions to superoxide dismutase subunits lacking metal ions in Zn sites, 189

Temperature studies
ligand binding to cytochrome *c* and other related haem proteins and peptides, 105
Thermodynamics
acceleration of ionic reactions by naturally occurring glycosaminoglycans, 165
for base binding to four atropisomers of Co(II) picket fence porphyrin; intramolecular ligand–ligand interactions, 175
Thioether complexes
synthesis and structural characterization of Cu(II) complex with 2-(ethylthiomethyl)benzimidazole, 5
Thiolate complexes
comparison of ^{13}C NMR chemical shifts of 2-aminovaleric acid, L-methionine and DL-selenomethionine and their interactions with aurothiomalate in aqueous solution, 209
Thiourea complexes
crystal structures of three thiourea (tu) complexes of Pt(II); *trans*-$[(tu)_2Pt(NH_3)_2]Cl_2$, *trans*-$[(tu)_2Pt(CH_3NH_2)_2]Cl_2 \cdot 3H_2O$ and $[Pt(tu)_4]Cl_2$, 51
Titanium complexes
antitumor properties of some titanocene chalcogenolates, 119
Tumor compounds
study of fluorescent substance contained in murine tumor C3H/MH 134, 75

Uranyl complexes
D-Glucose interaction with U ion; synthesis, spectroscopic and structural characterization of uranyl–glucose adducts and effect of metal cation binding on sugar anomeric structures, 155

Zinc complexes
derivatives of purple phosphatase from red kidney bean; replacement of Zn with other divalent metal ions, 39
highly active water-soluble Zn porphyrins for photoredox reactions, 77
interactions of water-soluble Zn porphyrins with amino acids, 199
